

When to Call the Warfarin Clinic

01
Rx

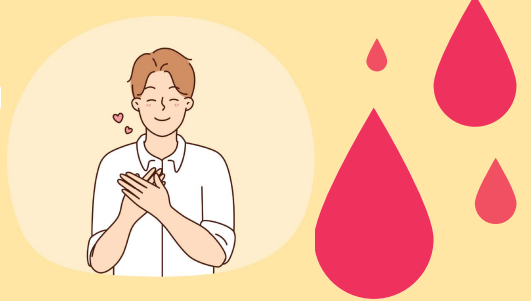

Medication Changes

- Warfarin interacts with many medications
- Please notify the Warfarin Clinic if:
 - You start any new medications (such as antibiotics, prescription or over-the-counter medications)
 - You change or stop any of your medications

Abnormal Signs & Symptoms

- Blood in urine, stool, or vomit
- Bleeding that doesn't stop after applying 10 minutes of pressure
- Worsening bruises with no known origin
- Chest pain or shortness of breath
- One-sided leg pain, redness, or swelling
- Facial droop, weak arms, or slurred speech

02

Hospitalizations or Emergency Room Visits

- Contact the Warfarin Clinic to inform us of any hospitalizations or ER visits
- During hospitalization, care is deferred to the hospital staff
- Warfarin Clinic will resume patient care upon discharge

03

Upcoming Procedures

- Inform all your doctors and dentists that you are on warfarin
- Contact the Warfarin Clinic to inform us of any upcoming procedures ahead of time, so we can coordinate your care

04

Travel or Vacation

- We can provide warfarin refills or external INR lab orders
- Promote blood circulation during long flights or road trips by stretching your legs, walking around, and wearing compression socks
